Local businesses. A clearer path to growth.

A practical guide to what customers see, what admins do, and what comes next.

DISCOVER → CONVERT → RETAIN

The customer is a local business owner.

Current public site: an interactive preview.
Real intake and accounts need persistent hosting.

One familiar navigation. Two working journeys.

The shared header serves visitors; workspace and operations serve different tasks.

Home + Solutions

/ · /growth

Understand the offer and four growth pillars.

Industries + Plans

/industries · /plans

Choose a sector and compare indicative options.

How it works + Audit

/how-it-works · /audit

Understand delivery, then request a conversation.

Demo + Footer

/workspace · /ops

Try workflows; admins use the private operations desk.

From interest to an agreed growth plan.

The audit starts a human conversation. It does not automatically book or charge the customer.

01

Understand

Home → Solutions
Identify the main growth priority.

02

Choose a fit

Industry → Process → Plans
Compare the approach and scope.

03

Request an audit

Business → Contact → Review
Submit when the backend is enabled.

04

Agree the work

Team follow-up → proposal
Confirm scope, access and terms manually.

A saved reference confirms receipt. Proposals, payments, scheduling and onboarding agreements remain outside the app.

Try the workflow. Understand the rhythm.

Growth overview · Enquiry desk · Review drafts · Visibility setup · Onboarding

AVAILABLE ON THE PUBLIC PREVIEW

Demo profiles

No login needed. Choose “Act as”, perform practice actions, then inspect the heatmap. Filter by person, day or 30/90/365-day range.

FULL BACKEND WHEN ENABLED

My real activity

Create an account or sign in. Your successful logins and workspace interactions form a private history. Clear history or delete the account when needed.

Quiet 0 · Light 1–2 · Steady 3–5 · Active 6–9 · Busy 10+ actions per day. Counts describe app usage, not growth.

Turn an audit request into a clear next step.

Open /ops and use the configured operations password. Customer accounts use a separate sign-in.

NEW

Review the request

Check business details, priorities and permission to reply.

REVIEWING

Prepare the audit

Review the opportunity and save useful internal notes.

CONTACTED

Follow up manually

Use an agreed channel outside the app. Record the outcome.

COMPLETED

Close the request

Save the final status and next step; export the queue if needed.

The operations desk does not manage customer passwords, organization roles, subscriptions or all users’ heatmaps.

Launch the service. Then grow the software.

A sensible sequence from the current preview to a working growth operation.

FIRST

Enable real intake

Persistent storage, HTTPS and secure team access. Test saved requests and account sign-in. Finalize privacy and support details.

NEXT

Run a small pilot

Manually deliver audit → proposal → onboarding → review. Prove the workflow with a focused group of local businesses.

THEN

Connect and measure

Connect authorized providers. Measure qualified enquiries, attended bookings, repeat visits and revenue from real source data.
